Job Description

Job Description (Job code: Scientific/Medical Writer)

- Responsible to produce abstracts, short communications, manuscripts, review articles, global medical slide sets, study slide sets, manuscript slide sets, slide sets for posters, slide set for oral presentations at scientific congresses, and other written communication materials supporting pharmaceutical brands, research activities, and business needs.
- Responsible for the tracking, quality control, and timely completion of the document components for complex medical writing projects, including annual reports, investigator brochure (IB) updates, package inserts, Clinical Study Reports (CSRs), protocols, and other regulatory documents. Responsibilities include working together with key client counterparts (e.g. Study Management, Statistics and Programming) to facilitate the completion of clinical study reports and their appendices. Understand new changes due to SOPs and regulatory guidelines.

Job role

- Work at PRIMO office on a full-time basis to prepare documents and review them under provided timelines and specifications
- Able to excel in unsupervised solo/group assignments
- Capable and willing to receive appropriate training
- Use appropriate templates, formats, and styles to ensure that documents, (including graphs and figures) generated meet internal and client requirements
- Work both, independently (unsupervised solo) and as part of a team
- Pleasant personality and positive attitude
- **Perfect** oral communication skills and **excellent** command of written English language

Time Commitment

- Full-time commitment. Time will be devoted to training, reading, literature search, actual writing, literature search, graphs figure creation, quality review, editing, authors' review, writers' review, project management, waiting period, etc.

Salary range

- 800 to 1800 Euros according to proven experience in scientific researches and publications.
