

The scientific policy of this workshop will privilege all the topics linked with "infinite dimensional statistical problems or methods" with special emphasis on:

- Statistical modelling for functional variables
- Functional Data Analysis
- Operator-based Statistics
- Background for Statistics in infinite-dimensional spaces

The aim of this event is to make a state of the art on these recent infinite-dimensional aspects of Statistics (expecting to emphasize some pertinent tracks for the future).

From a general point of view, we wish to organize a workshop not too big in terms of speakers (no parallel session) and not too long (5 half days). A reasonable number of "Oral communications" would be about 20. That is why we intend to organize a special "Poster session" for contributions unselected for "Oral communications".

We will edit a proceeding book (with Springer) containing the selected oral/poster communications as well as a special issue in the international journal of Statistics (TEST) for the best contributions in the prioritized areas of this meeting.

Important dates

Abstract submission (4-6 pages)

Until December 30th, 2010

Notification of decisions

February 15th, 2011

- **Guidelines for posters:**
- Poster size should not exceed 78 cm. width by 116 cm. height.
- It is recommended to be not smaller than 70 cm. width by 100 cm. height.
